

# SERIES 7010

The Accu-Time Series 7010 Physical Access Controller (PAC) provides a means of controlling the secure access of individuals through internal or external doors. The system operates by dedicating one Series 7010 to open two doors or control the in/out access for one door. The Series 7010 will ring an alarm and notify the host if a door is forced or propped open. The anti-passback control feature prevents an already entered employee from passing their badge back to an unauthorized individual. Worry-proof your business by investing in security provided by the Series 7010.

- Up to 512K memory for validation & transactions
- On-board LEDs for diagnostics
- EIA Standard RS485 or Ethernet interfaces
- Dual relays and sensors for door locks & alarms
- Easy programmability and setup
- Low voltage 12VDC power supply
- Choice of 5 readers
- Single or multi-controller environments
- Robust steel housing
- CE and FCC certified

Answers for HR Professionals™
