

Accu-Time Systems, Inc.

Series 7000

The Accu-Time Series 7000 provides a means of controlling the secure access of individuals through internal and/or external doors. The system operates by dedicating one Access Control Unit (ACU) to either open two doors or control the in/out access for one door. The Series 7000 provides support for anti-passback control. For example, employees are prevented from passing badges to unauthorized individuals. Worry-proof your business by investing in the security of the Series 7000.

- ▶ Up to 256K memory for validation & transactions
- ▶ On-board LEDs for diagnostics
- ▶ EIA Standard RS232/RS485 interfaces
- ▶ Dual relays and sensors for door locks & alarms
- ▶ Easy programmability and setup
- ▶ Low voltage 12VDC power supply
- ▶ Choice of 5 different readers, including biometrics
- ▶ Single or multi-controller environments
- ▶ Robust steel housing
- ▶ CE and FCC certified
