***Accu-Time Systems, Inc. Announces Launch of
Next Generation Human Capital Management (HCM) solutions:
Global Series™***

Ellington, CT – January, 2007 - Accu-Time Systems, Inc., the leading manufacturer of workforce management, time and attendance, and security access products, today announced the launch of its next generation Human Capital Management (HCM) solution, Maximus™ - a member of the Global Series from ATS.

Maximus is a state-of-the-art human resources Internet appliance that renders traditional “time clocks” obsolete by removing limitations through the use of open standards. Maximus is a cutting edge solution that both HR and IT executives can embrace with full HCM functionality and the ease of deployment that comes with a plug and play Internet appliance.

According to Peter DiMaria, founder and CEO of ATS, the Maximus opens up a world of opportunity for ATS partners and customers: “The Maximus builds on the history and reputation of the industry-leading Cyber Series, offering the highest level of quality and reliability in the industry in addition to being a state-of-the-art plug and play Internet appliance. Maximus is compatible with all other Global Series products, as well as legacy products, allowing for migration flexibility on a single platform.”

P. 2

Maximus features fully field-upgradeable input devices (badge, proximity, smartcard and biometric readers), memory, and displays. In addition, it utilizes a customizable keypad overlay and display lens that allows for customer-specified graphics which creates unique branding opportunities. Maximus is designed to be extremely easy to deploy, having full plug and play capabilities along with onboard and remote browser-based set-up.

According to Michael Glynn, Corporate Marketing Manager for ATS, the feature rich capabilities of Maximus make it the ideal solution for workforce management from both an HR and IT perspective. He explains: “Maximus was designed specifically to suit the evolving needs of our domestic and international customer base while bringing the latest technological advancements to the HR space. As a plug and play Internet appliance, the Maximus is easily deployable and scalable across multiple departments, divisions, locations, regions and countries – a truly global solution.”

Mr. DiMaria concludes: “The introduction of Maximus and the Global Series continues ATS’ commitment to being an ecologically responsible corporate citizen. All components used to manufacture Global Series products are recyclable and/or landfill-friendly as well as fully RoHS compliant. ATS is taking steps to become world-class in all areas of business operations, including several “green” initiatives. Maximus and the Global Series represent an important milestone in this process.”
