## ***Appointment of Strategic Alliance Partner and Authorized Integrator in Taiwan***

Ellington, CT –April 27, 2009 - Accu-Time Systems, Inc. (ATS), a global manufacturer of workforce management, time and attendance, and security access products, today announced the appointment of a new Strategic Alliance Partner and Authorized Integrator in Taiwan.

As ATS continues to expand internationally we are pleased to appoint Excel Systems of Taoyuan City, Taiwan, as the authorized integrator for our two-finger geometry camera in the Asia-Pacific region. ATS has been manufacturing and selling its proprietary two-finger biometric camera systems since 2007.

Peter DiMaria, Founder and Chief Executive Officer of Accu-Time Systems stated, “We have come to respect the talents of Excel and its employees as our relationship has developed over the last few years. We are delighted to have a partner in the region that is able both to sell and to integrate our technology.”

The two-finger camera reads the unique characteristics of any two fingers on the human hand, thereby providing a biometric element that does not carry the legal or cultural concerns of some other technologies. Ideally used in Time and Attendance as well as Access Control, this unique benefit reduces or eliminates buddy punching and unauthorized entry into secure and sensitive areas.

Alex Lin, General Manager for Excel, commented, “Since our inception, we have been installing systems with the two-finger technology. Since we have so much system integration technology we too are delighted to be able to work with Accu-Time Systems as the new owner of this technology.”
