For Immediate Release

NEMA 4X Workforce Management Terminal Receives IP65 Rating, Renamed MAXIMUS SEVERE DUTY

Ellington, CT – May 20, 2009 - Accu-Time Systems, Inc. (ATS), a global manufacturer of workforce management, time and attendance, and security access products, today announced that after several years of withstanding harsh environmental conditions, the NEMA 4X workforce management terminal from Accu-Time Systems (ATS) has received a name change.

The Maximus Severe Duty workforce management terminal (formerly named Maximus NEMA 4X) was developed by ATS to withstand continual exposure to wind-driven particles, rain, salt, fine dust, extreme heat and cold, and high-pressure washdowns. The Maximus Severe Duty terminal has its own keypad but can also be paired with biometric, barcode, and proximity card readers from ATS to provide a secure, reliable solution for workforce management and physical access control in the world's roughest installations.

With a recently approved IP65 rating, along with its NEMA 4X enclosure, the terminal is now called Maximus Severe Duty. The IP65 specification is a standard developed by the International Electrotechnical Commission (IEC), based in Switzerland. The specification describes the level of ingress protection (IP) that a device must withstand. The IP65 rating is internationally accepted as the standard for resistance to dust and water jets. The NEMA 4X rating includes those elements in addition to ice buildup and corrosion resistance.

*Maximus Severe Duty
Receives IP65 Rating
P. 2*

The Maximus Severe Duty is currently installed on offshore oil and gas platforms, in chemical processing plants, and in refining operations. Many Maximus Severe Duty terminals have direct exposure to a variety of extreme environments. Based on ATS' successful line of Maximus terminals, the Severe Duty version can be configured to meet the unique requirements of each customer.

The name change to Maximus Severe Duty best represents the terminal's ability to provide years of reliable service in some of the world's most unforgiving places.

About Accu-Time Systems, Inc.

Accu-Time Systems, headquartered in the United States, provides biometric and non-biometric workforce management (WFM) and human capital management (HCM) tools. Our systems are chosen by some of the world's largest retail, leisure and hospitality, and industrial suppliers. Our product line extends from simple entry-level time and attendance terminals to state-of-the-art programmable biometric systems for payroll, time and attendance, workforce management, and security access. ATS provides solutions for nearly every industry around the globe. For more information about Accu-Time Systems, Inc., and the entire line of ATS products, call (860) 870-5000, e-mail info@accu-time.com, or visit the ATS website at www.accu-time.com.
